

Class: _____ Name: _____

Unit 3 Amazing Animals

* Listen and write.

A (TR 18)

- B** Hi, Nancy. What are you reading?
- G** Hey, Rick. I'm reading about animals in the Antarctic _____, the South Pole.
- B** Oh, that's interesting. I was just reading about animals in the _____ polar region, the North Pole.
- G** Cool. Which animals live in the North _____?
- B** Arctic foxes and polar bears. They both have _____, white fur to keep warm.
- G** I see. Did you know that there are no land animals in the South Pole?
- B** Really? What animals live there then?
- G** There are animals like emperor penguins and leopard _____.
- B** I see. How do they keep warm?
- G** They have thick layers of _____ and _____!

B (TR 19)

- W** Hey, kids. How was your _____ trip to the zoo?
- B** It was great, Mom. I really liked the quokkas. They were like small and friendly _____ with happy faces.
- G** Right. I even took pictures with them! Also, I learned they only live in Australia.

- W** Very nice. What other animals did you see?
- G** I saw tarantulas.
- B** Ugh. The big, hairy spiders? Aren't they _____?
- G** The zookeeper said that they can _____. But they are not that dangerous.
- B** Really?
- G** Well, he said they won't bite if you don't _____ them. And their bites are similar to bee _____.
- B** Hmm. I still think they're _____.

C (TR 20)

- B** What are you watching, Nicole?
- G** Hi, Andy. It's a _____ about animals that saved people.
- B** I heard about a dog named Orion. He _____ a girl from being swept away in _____ rain.
- G** Wow. This pig named Lulu ran out to call for help when her owner had a _____.
- B** And there was this cat named Meskie. She woke her owners up from their sleep because the house was on fire.
- G** How _____, right?
- B** Yes. They're so smart.
- G** There was also Filippo, the dolphin.
- B** What did he do?
- G** When a boy fell off a boat, Filippo _____ him back on!
- B** These animals have such kind hearts. They're amazing!

D (TR 21)

M Welcome, everyone. Today's class is on _____ animals. Let's look at some examples. These are reindeer. It's no _____ Santa asked them to pull his _____. They travel about 4,000 km every year in the snow of North America. This bird is called the Arctic tern. Despite its name, it doesn't only _____ in the Arctic region. It travels from _____ to pole making journeys over 30,000 km every year. Lastly, even some _____ travel. Monarch butterflies travel between Mexico and the US and Canada, flying about 5,000 km every year. Now, let's talk about why they make these _____.
