### Unit 6 Technology

\* Listen and write.

**A** (TR 41)

- G** Did you watch the trailer for the new \_\_\_\_\_, *AI*?
- B** Yeah, I did. It looked interesting.
- G** Hey, would you ever get a \_\_\_\_\_ housekeeper, like in the movie?
- B** I think I would. I'll have it clean the house and \_\_\_\_\_ the \_\_\_\_\_.
- G** Hmm. I'm not sure about getting one myself.
- B** Why not? Doesn't it sound \_\_\_\_\_?
- G** It does. But what if the robot starts thinking on its own? \_\_\_\_\_  
\_\_\_\_\_ it gets angry at me one day and starts attacking me?
- B** I think you watched too many science fiction movies. That kind of thing won't happen for \_\_\_\_\_ hundred years or so.
- G** Are you sure?
- B** Of course. A robot \_\_\_\_\_ will help you with your work, cook food for you....
- G** Oh, will it \_\_\_\_\_ me?
- B** Sure! And it'll make your food just the way you want it.
- G** Uh, maybe I'll \_\_\_\_\_ one \_\_\_\_\_ have it cook for me then.

**B** (TR 42)

- B** I love my new \_\_\_\_\_ earphones. They're so convenient.

- G** I agree. I want to thank \_\_\_\_\_ wireless Bluetooth technology.
- B** Well, I don't know who invented the technology, but I know it was \_\_\_\_\_ a Danish king.
- G** Really? How did that happen?
- B** A long time ago, this king named Harald Bluetooth brought different Danish tribes together.
- G** All right.
- B** And you know how Bluetooth \_\_\_\_\_ can connect all kinds of different devices together, right?
- G** Yes. I'm connecting my Bluetooth earphones and smartwatch to my smartphone right now. And I even \_\_\_\_\_ my Bluetooth \_\_\_\_\_ at home too.
- B** Right. So, the technology \_\_\_\_\_ different smart devices \_\_\_\_\_, like how the king did with different tribes.
- G** Aha, I see.
- B** Also, even the Bluetooth \_\_\_\_\_ comes from the king's initials H and B \_\_\_\_\_ Danish.
- G** Oh, that's what the symbol meant. That's interesting.

### **C** (TR 43)

- W** Drones have a wide range of \_\_\_\_\_ in our lives. Who can tell me where or how they're used? Yes, Pete?
- B1** They are used to put out fires on \_\_\_\_\_. I saw it on the news once.
- W** You're right. Drones are unmanned, meaning no one is flying on them. So, they're used in \_\_\_\_\_ such as putting out fires.
- G** Similarly, I saw drones spray something over farm fields on the news too.
- W** Yes, Sue. Drones are \_\_\_\_\_ used in farming too.

**G** But why, Ms. Becker?

**W** \_\_\_\_\_ usually have various cameras and sensors. So, they can spray helpful chemicals over farm fields very \_\_\_\_\_ and accurately.

**G** I see.

**B2** Drones are also used for TV \_\_\_\_\_. They record videos from the sky, so we can see \_\_\_\_\_ and landscapes.

**W** Good example, Max. Drones can shoot videos from higher angles, so they \_\_\_\_\_ look more interesting.

**D** (TR 44)

**B** Technology is all around us. \_\_\_\_\_ technology, we use different devices every day that \_\_\_\_\_ our lives \_\_\_\_\_. How exactly does technology help each one of us? I interviewed my friends to \_\_\_\_\_. This is Amanda. Her grandpa lives in Switzerland. So, she often makes video calls to \_\_\_\_\_ see and talk to him. Before there were video calls, Amanda \_\_\_\_\_ to \_\_\_\_\_ all the way to Switzerland to see him. This is Tom. He uses an electric toothbrush. It helps him brush his teeth better. Before he used electric toothbrushes, he used to go to the dentist a lot. Now, he doesn't go \_\_\_\_\_. And this is Kate. She loves exercising. She always \_\_\_\_\_ her smartwatch when she exercises. She says the watch tells her about her \_\_\_\_\_ health condition and how much she exercised that day.
