Soil is everywhere. Soil is mostly made of rocks. How is it made?

Rainwater gets in small cracks in a rock. When the water freezes, the rock expands. Then the cracks widen. And the rock finally breaks down.

Trees and other plants can grow in cracks in a rock. Their roots make the cracks widen. In the end, the rock breaks down.

The small pieces of rocks mix with dead plants and animals. In that way, hard rocks become soft soil over a very long time.

Look at these things. There is a drum, a triangle, a tambourine, and castanets. They are all noisy and fun. Children really enjoy them. Are they toys? No way. They are musical instruments. We call them rhythm instruments.

You can play them very easily. You simply repeat one motion at a time. *Beat! Tap! Shake!* There is nothing to memorize. You just keep the beat and feel the rhythm. That's enough to enjoy music.
