Water is everywhere on the earth. We can see different forms of water in different places. We can find water in the oceans, in the ice, and in the air.

Water has three forms: solid, liquid, and gas.

Solid water is frozen water. Ice, snow, and frost are solid water. We can see lots of solid water in the North Pole.

Water usually means liquid water. We can find liquid water in oceans, rivers, and lakes. You can also see it in raindrops.

The gas form of water is called water vapor. When water gets hot, it becomes vapor. We cannot see it, but it is always in the air.

18. Where can you see lots of solid water?
