Water is everywhere on the earth. We can see different forms of water in different places. We can find water in the oceans, in the ice, and in the air.

Water has three forms: solid, liquid, and gas. Solid water is frozen water. Ice, snow, and frost are solid water. We can see lots of solid water in the North Pole.

Water usually means liquid water. We can find liquid water in oceans, rivers, and lakes. You can also see it in raindrops.

The gas form of water is called water vapor. When water gets hot, it becomes vapor. We cannot see it, but it is always in the air.

13. What is NOT solid water?

I did a group project in art class. My art teacher said, “There is Red Tomato Festival in our town. Many people visit our town to enjoy the festival. Let’s make posters for the event. All your posters will be on display during the festival.”

I worked together with Paul and Mary. We prepared a piece of poster board, markers, and crayons. First, we thought about the title and the phrases for the poster. And we talked about its design. Next, we created a cute tomato character. After that, we drew a sketch and colored it. Finally, we completed our cool poster.

13. What event is there in my town?
- ☐ a a food fair ☐ b a poster contest ☐ c a tomato festival
14. What was the group project in art class?
- ☐ a making posters ☐ b displaying posters ☐ c creating events
15. What did we create for our poster?
