I got a physical checkup last week. Today I received my results at school. I gained five kilograms in a year. But I grew just a little taller. Only two centimeters! I was very disappointed.

I asked my school nurse, “Ms. Davis, how can I grow faster?” She said, “Eating healthy food is very important. Drink milk every day. Eat eggs, chicken, spinach, carrots, and soybeans.” I said, “Eww.... I don’t like spinach and soybeans. But I will try!” She added, “You should also get enough sleep and exercise. Okay?” I nodded my head.

13. When did I get a physical checkup?

Light makes shadows. A shadow appears when an object blocks the light. When the sun moves during the day, shadows change their length.

In the early morning, the sun is low. The shadows are long. When the sun gets higher, the shadows get shorter. At noon, the sun is high up in the sky. The shadows are short. In the late afternoon, the sun goes down. Then the shadows get longer again.

Let's try an experiment. Shine a flashlight at a wall in a dark room. Move closer to the light. Then your shadow gets bigger. Move away from it. Then your shadow gets smaller.

16. What happens when an object blocks the light?
- ☐ a A shadow appears.
 - ☐ b The object gets bigger.
 - ☐ c The light goes out.
17. When the sun is low, the shadows are _____.

An old man planted some turnip seeds in the yard. One of his turnips grew bigger and bigger. It was enormous! He tried to pull it out, but it didn't move. He called his wife. They pulled together, but nothing happened. A boy came to the turnip to help. Again, it didn't move. They shouted to a girl playing by the tree. They pulled together. Nothing happened. The man's dog and cat came to help them.

All together, they pulled very hard. Heave ho, heave ho! *Pop!* Finally it came out. The old man cooked a nice turnip dinner. They all enjoyed it.
