around the world

It was

\_\_\_\_\_.

**[9-13] Read and write the correct words.**

stem

seed

vacation

visit

ground

A tomato begins as a \_\_\_\_\_. The small, brown seed needs soil and water.

A few days later, a root comes out of the bottom. It grows down into the \_\_\_\_\_.  
**10**

After a few weeks, a small \_\_\_\_\_ comes out of the top. It has two tiny seed leaves.  
**11**

The seedling grows taller. And it grows more small leaves.

Today was the first day of school. Mr. Brown asked the class, "What did you do for summer \_\_\_\_\_?" Everyone took a turn talking about their vacation.  
**12**

It was my turn. "This summer I \_\_\_\_\_ed Stonehenge. It's a special park in the UK."  
**13**  
Billy asked, "Why is it special?"

**[14-16] Read and choose the correct answers.**

All fruits have a few things in common. First, they have seeds inside. Second, they grow from flowers on a plant or a tree. Apples, watermelons, and mangoes are examples of fruits. Tomatoes have seeds and grow from flowers on a plant. So scientists think tomatoes are fruits.

- 14** All fruits have a few things in \_\_\_\_\_.  
 (a) common  
 (b) example
- 15** Apples, watermelons, and mangoes are examples of \_\_\_\_\_.  
 (a) vegetables  
 (b) fruits
- 16** Tomatoes have \_\_\_\_\_ and grow from flowers on a plant or a tree.  
 (a) seeds  
 (b) trees

**[17-18] Read and choose the correct answers.**

My class is in front of a cave. Everyone looks excited. But Ben is a little scared.

"Let's get ready, everyone! Wear a helmet first! It will protect your head," Ms. Carol says. "You are all wearing sneakers, right? The cave floors will be slippery and bumpy. Let's put on our jackets too. It will be cold inside the cave."

- 17** How do Ben's classmates feel in front of the cave?  
 (a) They are scared.  
 (b) They are excited.
- 18** What should they wear to be warm?  
 (a) jackets  
 (b) sneakers

**[19-20] Read and choose the correct answers.**

Some animals can make themselves disappear like magic. They hide themselves from their predators. And they hide to hunt other animals.

Flatfish are good hidere. They lie flat on the ocean floor. And they change colors to match the ocean floor. So their predators cannot find them. Flatfish have two eyes. They are on the upper side of their head. The fish can look and wait for smaller fish.

**19** Why do some animals make themselves disappear?

- Ⓐ to hide themselves from their predators
- Ⓑ to sleep on the ocean floor

**20** How many eyes do flatfish have?

- Ⓐ Flatfish have one eye.
- Ⓑ Flatfish have two eyes.
