

Unit 1. What's in a baseball?

S T E A M

Academic Objective	Learn about properties of different materials
Vocabulary	metal, wood, cork, rubber, leather, string
STEAM Project	Utility Chart 21st Century Skills: Critical Thinking, Creativity, Communication, Collaboration

[WARM-UP]

- Discuss the warm-up question to see how much background information students possess about the topic.
- Sample Answer: The materials I know are; metal, cement, concrete, fabric, leather, and wood.

[KEY WORDS]

- Have students look at the picture and play the audio. Have them repeat each word while looking at the picture to match the photograph and sound. Give simple explanations and examples when necessary.
- After practicing each word, play the audio again.
- Give students time to complete the exercise. Then have them check their answers in pairs or as a class.
- Answer: 2, 5, 1, 6, 3, 4

[READING]

- Play the audio once. After playing the audio, do choral reading and ask the students to repeat after you. Ask the students to point at each word as they read it.
- If necessary, have them read the text one more time by doing popcorn reading. (Have students take turns reading one line from the story. After they read one line, they call on another classmate to read the next line.)
- Scan the QR code to view the experiment.

[SHORT ACTIVITIES]

- Have students circle the key words to help them understand their meaning.
- Have them individually answer question D. Check the answer as a class and give a simple explanation if necessary.
- Answer: 1. wood 2. string

[AHA! I SEE!]

- Direct students' attention for further detail.
- Have them read the context to know the composition of the baseball. Help them understand different materials and its properties.
- Refer to Background Knowledge for more materials, their characteristics and common use. Pick some materials that students have answered in Warm-Up, and briefly discuss it as time allows.

[CHECK YOUR UNDERSTANDING]

- Give students 5-10 minutes to write their answers. Remind them to not refer to the reading or previous pages to check their understanding.
- Elicit answers from students. If there are any disagreements between students on the answers, have them cite the lines in the text that support their choices. For purpose, inference, or topic questions, elicit reasons why distractors are incorrect choices (ex. not in text, inaccurate, minor detail, etc.).
- Answer:
- A. Choose the correct answers. 1. c 2. b 3. b
- B. Look, read, and check. 1. a 2. a
- C. Number the pictures in the correct order. 2, 3, 4, 1
- D. Look, match, and write. 1. wood 2. metal 3. string 4. leather 5. rubber 6. cork

[STEAM PROJECT]

- Have students answer the chart. If needed, have them use the internet to find the properties of materials.
- Have them share the results of steps 1 and 2 with their partner or group. Ask different pairs of groups to represent their results to the class.
- Answer:

Materials	Strong	Light	Waterproof*
metal	✓	✗	✓
plastic	✗	✓	✓
wood	✓	✗	✗
paper	✗	✓	✗

- The best material to make a cup is plastic.
- Because it is light and waterproof.

Unit 2. Bo's House

S T E A M

Academic Objective	Learn about the best materials to use to build a house
Vocabulary	light, fold, safe, armor, brick, weather
STEAM Project	Design Your Own Pencil Case
	21st Century Skills: Critical Thinking, Creativity, Communication

2 BO'S HOUSE

KEY WORDS
Look, listen, and repeat.
eg light
+ fold
eg safe
+ armor
+ brick
+ weather

READING
Listen and read.
Three brothers build houses.
Billy builds a paper house. "Paper is light. It folds easily."
The wind blows the paper house away!
Bobby builds a metal house. "This house is safe. It's like armor!"
The sun comes out. The metal house gets too hot.
Bo builds a brick house. "Bricks are strong. They are safe in any weather!"

WARM-UP
What kind of house do you want to live in?

"Knock, knock."
It's Billy and Bobby.
"Can we stay with you?"

CHECK YOUR UNDERSTANDING
1. Choose the correct answers.
1. What is the main idea of this story?
a. Choosing good materials for houses is important.
b. The weather makes many problems.
c. Two brothers don't have a house to live in.
2. What is the problem with Billy's house and Bobby's house?
a. One isn't safe, and the other is too hot.
b. The paper house is safe, but the metal house is hot.
c. Both houses can fly away because of the wind.
3. Bo builds a _____ house.
a. paper b. metal c. brick

PROJECT: DESIGN YOUR OWN PENCIL CASE
STEP 1: What materials are these pencil cases made of? Circle the material and write their properties.
STEP 2: Now, choose a material and design your own pencil case.
STEP 3: Share your design with a friend.

[WARM-UP]

- Discuss the warm-up question to see how much background information students possess about the topic.
- Sample Answer: I want to live in a big farmhouse with a big kitchen.

[KEY WORDS]

- Have students look at the picture and play the audio. Have them repeat each word while looking at the picture to match the photograph and sound. Give simple explanations and examples when necessary.
- After practicing each word, play the audio again.
- Give students time to complete the exercise. Then have them check their answers in pairs or as a class.
- Answer: 1, 4, 5, 6, 2, 3

[READING]

- Play the audio once. After playing the audio, do choral reading and ask the students to repeat after you. Ask the students to point at each word as they read it.
- If necessary, have them read the text one more time by doing popcorn reading. (Have students take turns reading one line from the story. After they read one line, they call on another classmate to read the next line.)

[SHORT ACTIVITIES]

- Have students circle the key words to help them understand their meaning.
- Have them individually answer question D. Check the answer as a class and give a simple explanation if necessary.
- Answer: 1. armor 2. weather

[CHECK YOUR UNDERSTANDING]

- Give students 5-10 minutes to write their answers. Remind them to not refer to the reading or previous pages to check their understanding.
- Elicit answers from students. If there are any disagreements between students on the answers, have them cite the lines in the text that support their choices. For purpose, inference, or topic questions, elicit reasons why distractors are incorrect choices (ex. not in text, inaccurate, minor detail, etc.).
- Answer:
 - A. Choose the correct answers. 1. a 2. a 3. c
 - B. Look, read, and check. 1. a 2. a
 - C. Complete the chart.
 - Paper house: light
folds easily
 - Metal house: gets too hot
 - Brick house: strong
 - D. Unscramble and write. 1. light 2. fold 3. armor 4. weather 5. brick 6. safe

[STEAM PROJECT]

- Have students design their own pencil case.
- Have them share the answers of steps 1 and 2 with their partner or group. Ask different pairs of groups to represent their design to the class.
- Answer: 1st pencil case: wood / strong
2nd pencil case: fabric / foldable
3rd pencil case: plastic / foldable, waterproof, colorful.

Unit 3. Solid Shapes

S

T

E

A

M

Academic Objective	Learn about shape and volume
Vocabulary	long, round, square, flat, shape, volume (the amount of space)
STEAM Project	Find Ten Materials 21st Century Skills: Critical Thinking, Communication

KEY WORDS
Look, listen, and repeat.

WARM-UP
What different shapes can you find in the classroom?

READING
Listen and read.
Let's look at solid things.
Take a long wooden stick and some bowls.
Put the wooden stick in the bowls.
Put it in a long, round bowl.

CHECK YOUR UNDERSTANDING
1. Choose the correct answers.
1. What is the main idea of the lesson?
a. The volume of solid things can change.
b. The shape of solid things doesn't stay the same.
c. The volume and the shape of solid things don't change.
2. Metal, plastic, and wood are solid things.
a. one long b. one round c. do not change shape
3. Which of the following is NOT a solid?
a. pencil case b. wooden stick c. water

PROJECT: FIND TEN MATERIALS
Find and write ten materials.
1. _____ 2. _____ 3. _____ 4. _____ 5. _____ 6. _____ 7. _____ 8. _____ 9. _____ 10. _____
Which materials are solid?
Solid: _____
Share with a friend.

[WARM-UP]

- Discuss the warm-up question to see how much background information students possess about the topic.
- Sample Answer: I can see circles, squares, and rectangles.

[KEY WORDS]

- Have students look at the picture and play the audio. Have them repeat each word while looking at the picture to match the photograph and sound. Give simple explanations and examples when necessary.
- After practicing each word, play the audio again.
- Give students time to complete the exercise. Then have them check their answers in pairs or as a class.
- Answer: 2, 3, 5, 6, 4, 1

[READING]

- Play the audio once. After playing the audio, do choral reading and ask the students to repeat after you. Ask the students to point at each word as they read it.
- If necessary, have them read the text one more time by doing popcorn reading. (Have students take turns reading one line from the story. After they read one line, they call on another classmate to read the next line.)
- Scan the QR code to view the experiment.

[SHORT ACTIVITIES]

- Have students circle the key words to help them understand their meaning.
- Have them individually answer question D. Check the answer as a class and give a simple explanation if necessary.
- Answer: 1. square 2. volume

[AHA! I SEE!]

- Direct students' attention for further detail.
- Have them read the context to know shapes and volumes of different materials. Help them understand shape and volume of an object.
- Refer to Background Knowledge for more shapes of materials. Pick some materials that students have answered in Warm-Up, and briefly discuss it as time allows.

[CHECK YOUR UNDERSTANDING]

- Give students 5-10 minutes to write their answers. Remind them to not refer to the reading or previous pages to check their understanding.
- Elicit answers from students. If there are any disagreements between students on the answers, have them cite the lines in the text that support their choices. For purpose, inference, or topic questions, elicit reasons why distractors are incorrect choices (ex. not in text, inaccurate, minor detail, etc.).
- Answer:
 - A. Choose the correct answers. 1. c 2. c 3. c
 - B. Look, read, and check. 1. a 2. b
 - C. Fill in the blanks.
Solid things have their own shape and volume.
Solid things: Metal, Plastic, Wood
 - D. Choose the correct word.
1. flat 2. round 3. long 4. volume 5. square 6. shape
-

[STEAM PROJECT]

- Have students write ten materials and classify.
- Have them share the results of steps 1 and 2 with their partner or group. Ask different pairs of groups to represent their results to the class.
- Answer:
 - Step 1
1. wood 2. metal 3. thread 4. brick 5. paper 6. cork 7. rubber 8. water 9. iron 10. air
 - Step 2
Solid: wood, metal, thread, brick, paper, cork, rubber, iron

Unit 4. Solid or Liquid?

S T E A M

Academic Objective	Learn about solids and liquids
Vocabulary	sand, box, rectangle, liquid, grain, solid
STEAM Project	Find the Code 21st Century Skills: Critical Thinking

KEY WORDS
Look, listen, and repeat.

- a solid
- a box
- a rectangle
- a liquid
- a grain
- a solid

READING
Listen and read.
"Is sand a liquid?" asks Jon.
"When I put it in a round bowl, sand changes shape. It's round like the bowl.
This box is a rectangle. When I put sand in this box, it's a rectangle, too. Sand changes shape like a liquid."
"It looks like it changes shape," says the teacher.
"But the shape of the grains of sand doesn't change."

So, sand is a solid.
Solid things don't change shape or volume.

Circle the keywords in the reading.
Read and choose.
1. I have two long sides and two short sides. What am I? rectangle grain
2. I flow freely. What am I? solid liquid

CHECK YOUR UNDERSTANDING

Choose the correct answers.

1. What is the main idea of the lesson?
a. Solids change their volume and shape.
b. Sand is a liquid.
c. Solids don't change their shape or volume.
2. Why does Jason think sand is a liquid?
a. It takes the shape of a box.
b. Its grains don't change shape or volume.
c. It changes shape or volume.
3. Sand looks like it changes shape like a _____.
a. liquid b. solid c. gas

Look, read, and check.

1. ☐ a. Sand takes the shape of the box.
☐ b. Sand doesn't take the shape of the box.
2. ☐ a. The shape of the grains of sand doesn't change.
☐ b. The grains of sand change shape and volume.

Complete the chart.

Change shape or volume.	Sand changes but it doesn't change shape or volume.	change shape, but they don't change volume.
don't change shape or volume.		

PROJECT FIND THE CODE*
Read the problems and follow the clues.
May forgot the code to enter her house. She can't enter the house. Let's help her!
*In each box, there is a number and a property of solids or liquids. The code **2857** uses the number of the properties or solids.
*Remember that:
-The same number cannot appear side by side.
-The same number cannot appear above or below the same number.
-The number in the middle is the highest or the four numbers.

PROBLEM	CLUE	ANSWER
This is a thing you can see.	This is a thing that takes its shape if poured in your hand.	2
This is a thing that doesn't change shape or volume.	This is a thing that doesn't change shape or volume.	8
This is a thing that changes shape or volume.	This is a thing that doesn't change shape or volume.	5
This is a thing that doesn't change shape or volume.	This is a thing that doesn't change shape or volume.	7

Write the code here:

[WARM-UP]

- Discuss the warm-up question to see how much background information students possess about the topic.
- Sample Answer: I can see a desk, a chair, a table, and a pencil.

[KEY WORDS]

- Have students look at the picture and play the audio. Have them repeat each word while looking at the picture to match the photograph and sound. Give simple explanations and examples when necessary.
- After practicing each word, play the audio again.
- Give students time to complete the exercise. Then have them check their answers in pairs or as a class.
- Answer: 2, 1, 6, 3, 5, 4

[READING]

- Play the audio once. After playing the audio, do choral reading and ask the students to repeat after you. Ask the students to point at each word as they read it.
- If necessary, have them read the text one more time by doing popcorn reading. (Have students take turns reading one line from the story. After they read one line, they call on another classmate to read the next line.)

[SHORT ACTIVITIES]

- Have students circle the key words to help them understand their meaning.
- Have them individually answer question D. Check the answer as a class and give a simple explanation if necessary.
- Answer: 1. rectangle 2. liquid

[CHECK YOUR UNDERSTANDING]

- Give students 5-10 minutes to write their answers. Remind them to not refer to the reading or previous pages to check their understanding.
- Elicit answers from students. If there are any disagreements between students on the answers, have them cite the lines in the text that support their choices. For purpose, inference, or topic questions, elicit reasons why distractors are incorrect choices (ex. not in text, inaccurate, minor detail, etc.).
- Answer:
- A. Choose the correct answers. 1. c 2. a 3. a
- B. Look, read, and check. 1. a 2. a
- C. Complete the chart.
- Solids don't change shape or volume.
- Sand changes shape, but it doesn't change volume. A grain of sand doesn't change shape.
- Liquids change shape, but they don't change volume.
- D. Unscramble and write. 1. box 2. rectangle 3. grain 4. solid 5. sand 6. liquid

[STEAM PROJECT]

- Have students follow the clues and figure out the code.
- Have them share the results of step 2 with their partner or group. Ask different pairs of groups to represent their results to the class.
- Answer: Step 2: 141

Unit 5. Dancing Sounds

S

T

E

A

M

Academic Objective	Learn about sound vibrations
Vocabulary	speaker, sprinkles, zipper bag, volume (the level of sound), vibration, wave
STEAM Project	See Sound Challenge 21st Century Skills: Communication, Collaboration

The collage shows four pages from a student workbook. The first page is titled '5 DANCING SOUNDS' and includes a 'KEY WORDS' section with a 'WARM-UP' activity and a 'READING' section. The second page is titled 'CHECK YOUR UNDERSTANDING' and includes multiple-choice questions. The third page is titled 'PROJECT SEE SOUND CHALLENGE' and includes a QR code and instructions. The fourth page is titled 'VIBRATION' and includes a diagram of a speaker and a wave.

[WARM-UP]

- Discuss the warm-up question to see how much background information students possess about the topic.
- Sample Answer: I think we can feel sound, but I don't think we can see it.

[KEY WORDS]

- Have students look at the picture and play the audio. Have them repeat each word while looking at the picture to match the photograph and sound. Give simple explanations and examples when necessary.
- After practicing each word, play the audio again.
- Give students time to complete the exercise. Then have them check their answers in pairs or as a class.
- Answer: 2, 6, 1, 3, 4, 5

[READING]

- Play the audio once. After playing the audio, do choral reading and ask the students to repeat after you. Ask the students to point at each word as they read it.
- If necessary, have them read the text one more time by doing popcorn reading. (Have students take turns reading one line from the story. After they read one line, they call on another classmate to read the next line.)
- Scan the QR code to view the experiment.

[SHORT ACTIVITIES]

- Have students circle the key words to help them understand their meaning.
- Have them individually answer question D. Check the answer as a class and give a simple explanation if necessary.
- Answer: 1. wave 2. sprinkles

[CHECK YOUR UNDERSTANDING]

- Give students 5-10 minutes to write their answers. Remind them to not refer to the reading or previous pages to check their understanding.
- Elicit answers from students. If there are any disagreements between students on the answers, have them cite the lines in the text that support their choices. For purpose, inference, or topic questions, elicit reasons why distractors are incorrect choices (ex. not in text, inaccurate, minor detail, etc.).
- Answer:
- A. Choose the correct answers. 1. a 2. b 3. c
- B. Look, read, and check. 1. a 2. a
- C. Number the pictures in the correct order. 2, 1, 4, 3
- D. Look, match, and write. 1. speaker 2. volume 3. vibration 4. sprinkles 5. zipper bag 6. wave

[STEAM PROJECT]

- Have students do the experiment.
- Have them share the results of the experiment with their partner or group. Ask different pairs of groups to represent their results to the class.
- Refer to PROJECT REFERENCE at the end of the book for further explanation.
- Give the answer and with reasons based on PROJECT REFERENCE.
- Answer:
Step 2
1. loud music: The tissue paper moves a lot.
2. soft music: The tissue paper moves a little.
I think this happens because of the sound vibrations created by the music. Loud music has stronger vibrations.

Unit 6. Buzzing Bees

S T E A M

Academic Objective	Learn about movement and sound
Vocabulary	bee, fly, buzz, wing, fast, arm
STEAM Project	How to Make a String Phone 21st Century Skills: Critical Thinking, Communication, Collaboration

[WARM-UP]

- Discuss the warm-up question to see how much background information students possess about the topic.
- Sample Answer: I think bees buzz by flapping their wings really fast.

[KEY WORDS]

- Have students look at the picture and play the audio. Have them repeat each word while looking at the picture to match the photograph and sound. Give simple explanations and examples when necessary.
- After practicing each word, play the audio again.
- Give students time to complete the exercise. Then have them check their answers in pairs or as a class.
- Answer: 2, 6, 5, 3, 1, 4

[READING]

- Play the audio once. After playing the audio, do choral reading and ask the students to repeat after you. Ask the students to point at each word as they read it.
- If necessary, have them read the text one more time by doing popcorn reading. (Have students take turns reading one line from the story. After they read one line, they call on another classmate to read the next line.)

[SHORT ACTIVITIES]

- Have students circle the key words to help them understand their meaning.
- Have them individually answer question D. Check the answer as a class and give a simple explanation if necessary.
- Answer: 1. bee 2. buzz

[AHA! I SEE!]

- Direct students' attention for further detail.
- Have them read the context to know how bees make buzzing sound. Help them understand movement and sound.
- Refer to Background Knowledge for more information about sound waves. Briefly discuss the students' answer in Warm-Up as time allows.

[CHECK YOUR UNDERSTANDING]

- Give students 5-10 minutes to write their answers. Remind them to not refer to the reading or previous pages to check their understanding.
- Elicit answers from students. If there are any disagreements between students on the answers, have them cite the lines in the text that support their choices. For purpose, inference, or topic questions, elicit reasons why distractors are incorrect choices (ex. not in text, inaccurate, minor detail, etc.).
- Answer:
 - A. Choose the correct answers. 1. b 2. c 3. a
 - B. Look, read, and check. 1. a 2. a
 - C. Complete the chart.
 - Cause: A bee moves its wings very fast.
 - Effect: The air vibrates.
 - Cause: The air shakes your eardrum.
 - Effect: You hear a buzzing sound.
 - D. Circle the correct word. 1. wings 2. bees 3. fast 4. arm 5. fly 6. buzzed

[STEAM PROJECT]

- Have students do the experiment.
- Have them share the results of step 1 with their partner or group. Ask different pairs of groups to represent their results to the class.
- Refer to PROJECT REFERENCE at the end of the book for further explanation.
- Give the answer and with reasons based on PROJECT REFERENCE.
- Answer: 3, 2, 4, 5, 1
 - 1. The girl speaks into the cup.
 - 2. The girl's voice vibrates the air inside the cup.
 - 3. The bottom of the cup passes the sound waves to the string.
 - 4. The sound wave passes to the boy's cup by the string.
 - 5. The boy can hear the girl's voice.

Unit 7. Juicy Cups

S

T

E

A

M

Academic Objective	Learn about characteristics of liquids
Vocabulary	bottle, juice, pour, see-through, mark, height
STEAM Project	Who Gets What? 21st Century Skills: Critical Thinking

[WARM-UP]

- Discuss the warm-up question to see how much background information students possess about the topic.
- Sample Answer: Juice, oil, water, gasoline, milk, soda

[KEY WORDS]

- Have students look at the picture and play the audio. Have them repeat each word while looking at the picture to match the photograph and sound. Give simple explanations and examples when necessary.
- After practicing each word, play the audio again.
- Give students time to complete the exercise. Then have them check their answers in pairs or as a class.
- Answer: 2, 1, 6, 5, 3, 4

[READING]

- Play the audio once. After playing the audio, do choral reading and ask the students to repeat after you. Ask the students to point at each word as they read it.
- If necessary, have them read the text one more time by doing popcorn reading. (Have students take turns reading one line from the story. After they read one line, they call on another classmate to read the next line.)
- Scan the QR code to view the experiment.

[SHORT ACTIVITIES]

- Have students circle the key words to help them understand their meaning.
- Have them individually answer question D. Check the answer as a class and give a simple explanation if necessary.
- Answer: 1. juice 2. bottle

[AHA! I SEE!]

- Direct students' attention for further detail.
- Have them read the context to know the changing shape of the juice. Help them understand the characteristics of liquids.
- Refer to Background Knowledge for more characteristics of liquids. Pick some liquids that students have answered in Warm-Up, and briefly discuss it as time allows.

[CHECK YOUR UNDERSTANDING]

- Give students 5-10 minutes to write their answers. Remind them to not refer to the reading or previous pages to check their understanding.
- Elicit answers from students. If there are any disagreements between students on the answers, have them cite the lines in the text that support their choices. For purpose, inference, or topic questions, elicit reasons why distractors are incorrect choices (ex. not in text, inaccurate, minor detail, etc.).
- Answer:
- A. Choose the correct answers. 1. c 2. b 3. b
- B. Look, read, and check. 1. a 2. b
- C. Number the pictures in the correct order. 4, 1, 3, 2
- D. Unscramble and write. 1. see-through 2. mark 3. height 4. juice 5. bottle 6. pour
-

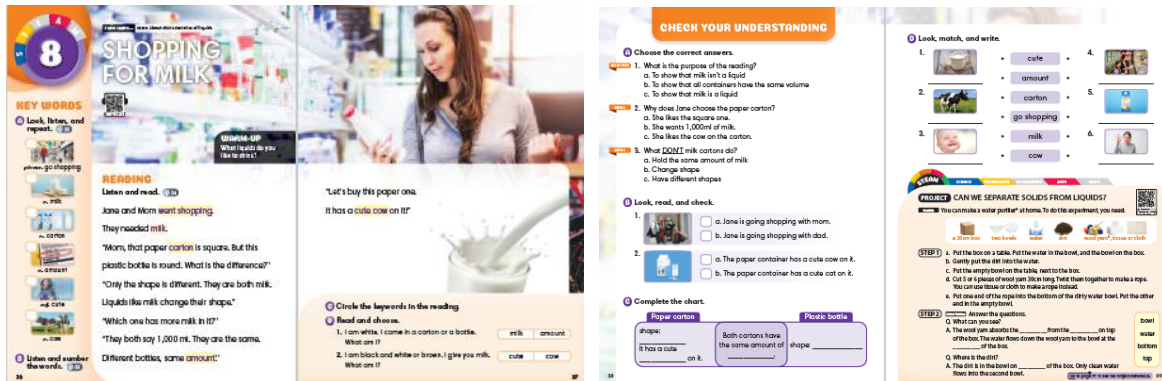

[STEAM PROJECT]

- Have students answer the questions.
- Have them share the results of steps 1 to 2-1 with their partner or group. Ask different pairs of groups to represent their results to the class.
- Answer:
- Step 1: shoes, ball, bag
- Step 1-1: solids
- Step 2: milk
- Step 2-1: liquid, Mary

Unit 8. Shopping for Milk

Academic Objective	Learn more about characteristics of liquids
Vocabulary	go shopping, milk, carton, amount, cute, cow
STEAM Project	Make a Water Purifier
	21st Century Skills: Creativity, Critical Thinking

[WARM-UP]

- Discuss the warm-up question to see how much background information students possess about the topic.
- Sample Answer: I like to drink water, juice, and milk.

[KEY WORDS]

- Have students look at the picture and play the audio. Have them repeat each word while looking at the picture to match the photograph and sound. Give simple explanations and examples when necessary.
- After practicing each word, play the audio again.
- Give students time to complete the exercise. Then have them check their answers in pairs or as a class.
- Answer: 2, 5, 3, 1, 4, 6

[READING]

- Play the audio once. After playing the audio, do choral reading and ask the students to repeat after you. Ask the students to point at each word as they read it.
- If necessary, have them read the text one more time by doing popcorn reading. (Have students take turns reading one line from the story. After they read one line, they call on another classmate to read the next line.)

[SHORT ACTIVITIES]

- Have students circle the key words to help them understand their meaning.
- Have them individually answer question D. Check the answer as a class and give a simple explanation if necessary.
- Answer: 1. milk 2. cow

[CHECK YOUR UNDERSTANDING]

- Give students 5-10 minutes to write their answers. Remind them to not refer to the reading or previous pages to check their understanding.
- Elicit answers from students. If there are any disagreements between students on the answers, have them cite the lines in the text that support their choices. For purpose, inference, or topic questions, elicit reasons why distractors are incorrect choices (ex. not in text, inaccurate, minor detail, etc.).
- Answer:
 - A. Choose the correct answers. 1. c 2. c 3. b
 - B. Look, read, and check. 1. a 2. a
 - C. Complete the chart.
 - Paper carton - shape: square It has a cute cow on it.
 - Both milk have the same amount of milk.
 - Plastic bottle - shape: round
 - D. Look, match, and write.
 - 1. milk 2. cow 3. cute 4. go shopping 5. carton 6. amount

[STEAM PROJECT]

- Have students do the experiment and complete the blanks.
- Have them share the answers of the blanks with their partner or group. Ask different pairs of groups to represent their answers to the class.
- Refer to PROJECT REFERENCE at the end of the book for further explanation.
- Give the answer and with reasons based on PROJECT REFERENCE.
- Answer:
 - The rope absorbs the water from the bowl on top of the box. The water flows down the rope to the bowl at the bottom of the box.
 - The dirt is in the bowl on top of the box.

Unit 9. Having Fun with Magnets

S T E A M

Academic Objective	Learn about magnets and magnetism
Vocabulary	stick, magnet, button, paper clip, pin, chopstick
STEAM Project	Magnet Moving Frame 21st Century Skills: Creativity, Critical Thinking

The image shows four pages from a lesson plan for Unit 9, 'Having Fun with Magnets'. The first page is a 'KEY WORDS' page with a list of words: stick, magnet, button, paper clip, pin, chopstick. The second page is a 'WARM-UP' page with a question: 'What happens when you put a magnet next to a pin?' and a diagram showing a magnet attracting a pin. The third page is a 'READING' page with a text about magnets and a diagram showing a magnet attracting a paper clip. The fourth page is a 'PROJECT' page titled 'MAGNETIC MOVING PICTURE' with instructions for a project and a list of materials.

[WARM-UP]

- Discuss the warm-up question to see how much background information students possess about the topic.
- Sample Answer: The magnet pulls the pin to it.

[KEY WORDS]

- Have students look at the picture and play the audio. Have them repeat each word while looking at the picture to match the photograph and sound. Give simple explanations and examples when necessary.
- After practicing each word, play the audio again.
- Give students time to complete the exercise. Then have them check their answers in pairs or as a class.
- Answer: 6, 2, 3, 1, 4, 5

[READING]

- Play the audio once. After playing the audio, do choral reading and ask the students to repeat after you. Ask the students to point at each word as they read it.
- If necessary, have them read the text one more time by doing popcorn reading. (Have students take turns reading one line from the story. After they read one line, they call on another classmate to read the next line.)
- Scan the QR code to view the experiment.

[SHORT ACTIVITIES]

- Have students circle the key words to help them understand their meaning.
- Have them individually answer question D. Check the answer as a class and give a simple explanation if necessary.
- Answer: 1. chopstick 2. paper clip

[AHA! I SEE!]

- Direct students' attention for further detail.
- Have them read the context to know the materials that stick to a magnet. Help them understand about magnets and magnetism.
- Refer to Background Knowledge for more examples of metal objects. Pick some materials in home, and briefly discuss it as time allows.

[CHECK YOUR UNDERSTANDING]

- Give students 5-10 minutes to write their answers. Remind them to not refer to the reading or previous pages to check their understanding.
- Elicit answers from students. If there are any disagreements between students on the answers, have them cite the lines in the text that support their choices. For purpose, inference, or topic questions, elicit reasons why distractors are incorrect choices (ex. not in text, inaccurate, minor detail, etc.).
- Answer:
 - A. Choose the correct answers. 1. a 2. c 3. c
 - B. Look, read, and check. 1. b 2. b
 - C. Complete the chart.
 - Cause: A magnet has a magnetic field.
 - Effect: Metals stick to it.
 - Cause: The magnet only attracts metal.
 - Effect: It doesn't attract plastic, wood, rubber, or glass.
 - D. Look, match, and write.
 - 1. pin 2. magnet 3. chopstick 4. button 5. stick 6. paper clip

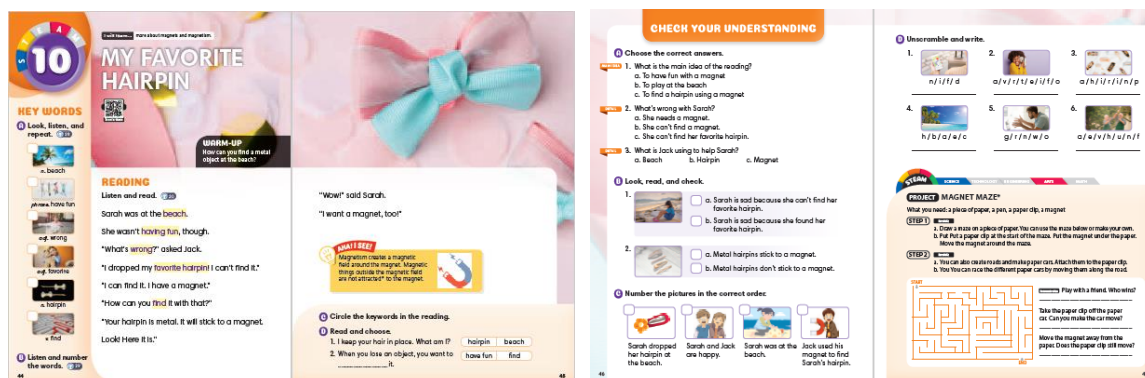

[STEAM PROJECT]

- Have students make the magnetic picture frame.
- Have them share the results of step 1 with their partner or group. Ask different pairs of groups to represent their results to the class.
- Answer:
 - Q1. The picture of the scooter moved wherever the magnet moved.
 - Q2. The paper clip stuck to the magnet, which caused the magnet to pull the picture of the scooter across the background picture.

Unit 10. My Favorite Hairpin

Academic Objective	Learn more about magnets and magnetism
Vocabulary	beach, have fun, wrong, favorite, hairpin, find
STEAM Project	Magnet Maze
	21st Century Skills: Creativity, Collaboration, Communication

[WARM-UP]

- Discuss the warm-up question to see how much background information students possess about the topic.
- Sample Answer: You can use a magnet to find a metal object at the beach.

[KEY WORDS]

- Have students look at the picture and play the audio. Have them repeat each word while looking at the picture to match the photograph and sound. Give simple explanations and examples when necessary.
- After practicing each word, play the audio again.
- Give students time to complete the exercise. Then have them check their answers in pairs or as a class.
- Answer: 6, 2, 3, 1, 4, 5

[READING]

- Play the audio once. After playing the audio, do choral reading and ask the students to repeat after you. Ask the students to point at each word as they read it.
- If necessary, have them read the text one more time by doing popcorn reading. (Have students take turns reading one line from the story. After they read one line, they call on another classmate to read the next line.)

[SHORT ACTIVITIES]

- Have students circle the key words to help them understand their meaning.
- Have them individually answer question D. Check the answer as a class and give a simple explanation if necessary.
- Answer: 1. hairpin 2. find

[AHA! I SEE!]

- Direct students' attention for further detail.
- Have them read the context to know the magnetism of the magnet. Help them understand magnetic field around magnets.
- Refer to Background Knowledge for more metal objects, their characteristics and common use. Share what students answered in Warm-Up, and briefly discuss it as time allows.

[CHECK YOUR UNDERSTANDING]

- Give students 5-10 minutes to write their answers. Remind them to not refer to the reading or previous pages to check their understanding.
- Elicit answers from students. If there are any disagreements between students on the answers, have them cite the lines in the text that support their choices. For purpose, inference, or topic questions, elicit reasons why distractors are incorrect choices (ex. not in text, inaccurate, minor detail, etc.).
- Answer:
- A. Choose the correct answers. 1. c 2. c 3. c
- B. Look, read, and check. 1. a 2. a
- C. Number the pictures in the correct order. 2, 4, 1, 3
- D. Unscramble and write. 1. find 2. favorite 3. hairpin 4. beach 5. wrong 6. have fun

[STEAM PROJECT]

- Have students draw the maze and play with friends.
- Have them share the results of the questions with their partner or group. Ask different pairs of groups to represent their results to the class.
- Answer:
- Q2. I can't make the car move because the paper car does not contain metal.
- Q3. If the magnet is fairly close to the paper, the paper clip still moves because the magnetic field of magnet attracts the paper clip.

Unit 11. Making Scales

S T E A M

Academic Objective	Learn about weight and mass
Vocabulary	weigh, scale, pants hanger, choose, both, heavy
STEAM Project	Solve a Problem
	21st Century Skills: Critical Thinking, Collaboration

Unit 11 MAKING SCALES

KEY WORDS
Look, listen, and repeat. (audio icon)
a. weigh
b. scale
c. pants hanger
d. choose
e. both
f. heavy

WARM-UP
Ask a partner to choose a book and a bottle. Do they weigh the same?

READING
Listen and read. (audio icon)
Do you need to weigh something?
Do you have a scale? You don't?
How can you weigh it?
You can make a scale at home.

Check Your Understanding
1. Choose the correct answers.
1. What is the main purpose of the reading?
a. to teach us about weight
b. to teach us to make a zipper bag
c. to teach us to make a scale
2. When are two objects the same weight?
a. When one is bigger than the other
b. When the two zipper bags are at the same level
c. When they are the same size
3. Which item is NOT needed to weigh an object on your new scale?
a. Zipper bags b. A bag c. A pants hanger
2. Look, read, and check.
1. ☐ a. The small box and the big box weigh the same.
☐ b. The big box weighs more than the small box.
2. ☐ a. A balloon is very heavy.
☐ b. A balloon doesn't weigh a lot.
3. Fill in the blanks.
The _____ of an object is the force that gravity uses to pull it down to Earth. The _____ of an object is how much stuff is inside it.
_____ = mass X gravity

SOLVE A PROBLEM
Sarah is doing math. How many marbles? Does she need so that both paper cups are at the same level? To solve this problem, you need:
marbles, a scale, a book, a pencil
PROBLEM 1 Sarah has five marbles in one cup and 12 marbles in the other cup. How many marbles does she need so that both cups are at the same level?
PROBLEM 2 Sarah knows a book and a pencil together weigh 18 marbles. She knows the book weighs 12 marbles. How many marbles does the pencil weigh?

[WARM-UP]

- Discuss the warm-up question to see how much background information students possess about the topic.
- Sample Answer: The book and the water bottle I chose do not weigh the same. The water bottle is heavier.

[KEY WORDS]

- Have students look at the picture and play the audio. Have them repeat each word while looking at the picture to match the photograph and sound. Give simple explanations and examples when necessary.
- After practicing each word, play the audio again.
- Give students time to complete the exercise. Then have them check their answers in pairs or as a class.
- Answer: 1, 2, 3, 4, 5, 6

[READING]

- Play the audio once. After playing the audio, do choral reading and ask the students to repeat after you. Ask the students to point at each word as they read it.
- If necessary, have them read the text one more time by doing popcorn reading. (Have students take turns reading one line from the story. After they read one line, they call on another classmate to read the next line.)
- Scan the QR code to view the experiment.

[SHORT ACTIVITIES]

- Have students circle the key words to help them understand their meaning.
- Have them individually answer question D. Check the answer as a class and give a simple explanation if necessary.
- Answer: 1. pants hanger 2. weigh

[AHA! I SEE!]

- Direct students' attention for further detail.
- Have them read the context to know the weight of an object. Help them understand about weight and mass of different objects.
- Refer to Background Knowledge for more kinds of scales and how to use. Pick a material at home and briefly discuss how to weigh it as time allows.

[CHECK YOUR UNDERSTANDING]

- Give students 5-10 minutes to write their answers. Remind them to not refer to the reading or previous pages to check their understanding.
- Elicit answers from students. If there are any disagreements between students on the answers, have them cite the lines in the text that support their choices. For purpose, inference, or topic questions, elicit reasons why distractors are incorrect choices (ex. not in text, inaccurate, minor detail, etc.).
- Answer:
- A. Choose the correct answers. 1. a 2. b 3. b
- B. Look, read, and check. 1. a 2. b
- C. Fill in the blanks.
- The weight of an object is the force that gravity uses to pull its mass to Earth. The mass of an object is how much stuff is inside it.
- weight = mass X gravity
- D. Look, match, and write.
- 1. pants hanger 2. choose 3. scale 4. both 5. heavy 6. weigh

[STEAM PROJECT]

- Have students solve the problems.
- Have them share the results of problems 1 and 2 with their partner or group. Ask different pairs of groups to represent their results to the class.
- Answer:
- Problem 1: If all of the marbles are the same size and weight, she will need to put seven more marbles in the cup with only five marbles.
- Problem 2: The pencil weighs three marbles.

Unit 12. Different Kinds of Scales

S T E A M

Academic Objective	Learn about scales
Vocabulary	flour, cake, check, bathroom, kitchen, hospital
STEAM Project	Does Air Have Weight? 21st Century Skills: Critical Thinking

[WARM-UP]

- Discuss the warm-up question to see how much background information students possess about the topic.
- Sample Answer: No, they are not the same. The scales in the kitchen are smaller. They cannot weigh things that are really heavy like the bathroom scale can.

[KEY WORDS]

- Have students look at the picture and play the audio. Have them repeat each word while looking at the picture to match the photograph and sound. Give simple explanations and examples when necessary.
- After practicing each word, play the audio again.
- Give students time to complete the exercise. Then have them check their answers in pairs or as a class.
- Answer: 2, 1, 3, 6, 4, 5

[READING]

- Play the audio once. After playing the audio, do choral reading and ask the students to repeat after you. Ask the students to point at each word as they read it.
- If necessary, have them read the text one more time by doing popcorn reading. (Have students take turns reading one line from the story. After they read one line, they call on another classmate to read the next line.)

[SHORT ACTIVITIES]

- Have students circle the key words to help them understand their meaning.
- Have them individually answer question D. Check the answer as a class and give a simple explanation if necessary.
- Answer: 1. flour 2. kitchen

[AHA! I SEE!]

- Direct students' attention for further detail.
- Have them read the context to know the different uses of scales. Help them understand about different kinds of scales.
- Refer to Background Knowledge for more scales, their characteristics and common use. Pick different kinds of scales with different purposes, and briefly discuss it as time allows.

[CHECK YOUR UNDERSTANDING]

- Give students 5-10 minutes to write their answers. Remind them to not refer to the reading or previous pages to check their understanding.
- Elicit answers from students. If there are any disagreements between students on the answers, have them cite the lines in the text that support their choices. For purpose, inference, or topic questions, elicit reasons why distractors are incorrect choices (ex. not in text, inaccurate, minor detail, etc.).
- Answer:
 - A. Choose the correct answers. 1. a 2. b 3. c
 - B. Look, read, and check. 1. b 2. b
 - C. Complete the chart.
 - We use different scales to weigh different things.
 - Kinds of Scales: kitchen scale, bathroom scale, hospital scale
 - D. Unscramble and write. 1. kitchen 2. flour 3. hospital 4. cake 5. check 6. bathroom

[STEAM PROJECT]

- Have students do the experiment.
- Have them share the results of step 2 with their partner or group. Ask different pairs of groups to represent their results to the class.
- Refer to PROJECT REFERENCE at the end of the book for further explanation.
- Give the answer and with reasons based on PROJECT REFERENCE.
- Answer:
 - Step 2
 - The other balloon goes down. This is because it is full of air. So air has weight.

Unit 13. Fruit Boats

S T E A M

Academic Objective	Learn about sinking and floating
Vocabulary	boat, half, sail, sink, float, density
STEAM Project	Sink or Float Challenge 21st Century Skills: Critical Thinking, Creativity

13 FRUIT BOATS

KEY WORDS
Look, listen, and repeat.

READING
Listen and read.
Mary and Peter are going to make boats. They are using an apple, lemon, cherry, and kiwi. Which fruit can you make into a boat? Let's make fruit boats!

WARM-UP
Do you think tomatoes sink or float in water?

CHECK YOUR UNDERSTANDING

1. Choose the correct answers.
1. What is the main purpose of doing this experiment?
a. To learn how to make real boats
b. To learn about density
c. To learn how fruit grows

2. Apples and _____ float.
a. cherries
b. kiwis
c. lemons

3. What is NOT needed to make a boat?
a. A sail
b. Water
c. Fruit

4. Look, read, and check.
1. ☐ a. Cut the fruit in half to make a boat.
2. ☐ b. Cut the fruit in pieces to make a boat.

5. Number the pictures in the correct order.
1. ☐ a. Cherries and kiwis float in water.
2. ☐ b. Apples and lemons float in water.

SINK OR FLOAT CHALLENGE
Have you ever wondered which things sink or float? Prepare some things around you and do the experiment! Draw and write down the sink or float in each box.

SINK **FLOAT**

Materials: shell, paper, rubber, soda, rice, butter

[WARM-UP]

- Discuss the warm-up question to see how much background information students possess about the topic.
- Sample Answer: I think tomatoes sink in water.

[KEY WORDS]

- Have students look at the picture and play the audio. Have them repeat each word while looking at the picture to match the photograph and sound. Give simple explanations and examples when necessary.
- After practicing each word, play the audio again.
- Give students time to complete the exercise. Then have them check their answers in pairs or as a class.
- Answer: 6, 2, 3, 4, 1, 5

[READING]

- Play the audio once. After playing the audio, do choral reading and ask the students to repeat after you. Ask the students to point at each word as they read it.
- If necessary, have them read the text one more time by doing popcorn reading. (Have students take turns reading one line from the story. After they read one line, they call on another classmate to read the next line.)
- Scan the QR code to view the experiment.

[SHORT ACTIVITIES]

- Have students circle the key words to help them understand their meaning.
- Have them individually answer question D. Check the answer as a class and give a simple explanation if necessary.
- Answer: 1. sail 2. sink

[AHA! I SEE!]

- Direct students' attention for further detail.
- Have them read the context to know which materials sink or float. Help them understand lower and high density of the materials.
- Refer to Background Knowledge for more materials and their characteristics. Pick some materials in home, and briefly discuss it as time allows.

[CHECK YOUR UNDERSTANDING]

- Give students 5-10 minutes to write their answers. Remind them to not refer to the reading or previous pages to check their understanding.
- Elicit answers from students. If there are any disagreements between students on the answers, have them cite the lines in the text that support their choices. For purpose, inference, or topic questions, elicit reasons why distractors are incorrect choices (ex. not in text, inaccurate, minor detail, etc.).
- Answer:
- A. Choose the correct answers. 1. b 2. c 3. b
- B. Look, read, and check. 1. a 2. b
- C. Number the pictures in the correct order. 4, 1, 2, 3
- D. Look, match, and write. 1. sink 2. float 3. sail 4. boat 5. density 6. half
-

[STEAM PROJECT]

- Have them do the experiment.
- Have students fill out each box.
- Have them share the results of steps 1 and 2 with their partner or group. Ask different pairs of groups to represent their results to the class.
- Refer to PROJECT REFERENCE at the end of the book for further explanation.
- Give the answer and with reasons based on PROJECT REFERENCE.
- Answer:
- Sink: cherry, kiwi, chalk, rubber, cola
- Float: paper, rice, butter

Unit 14. The Farmer's Secret

S T E A M

Academic Objective	Learn about density
Vocabulary	grow, rice, secret, seed, salt, empty
STEAM Project	Density Chart 21st Century Skills: Critical Thinking, Communication

Unit 14 THE FARMER'S SECRET

KEY WORDS
Look, listen, and repeat. (audio icon)
• grow
• rice
• secret
• seed
• salt
• empty

WARM-UP
What things do farmers need to think about?

READING
Listen and read. (audio icon)
Mary and Brian are farmers. Brian grows a lot of rice. But Mary doesn't grow a lot. Mary asks Brian, "How do you grow so much?" "I am going to tell you," Brian says. "But don't tell anyone else." "The secret is density. Put rice seeds in salt water. Good seeds sink. Bad seeds float."

Bad seeds are empty. I only use good seeds. So I get a lot of rice.

SECRET
Density is the measure of a unit mass compared to its volume. The higher an object's density, the higher it floats per volume.
density = mass ÷ volume

CIRCLE THE KEYWORDS IN THE READING.
Read and choose.
1. I am something you can't tell others. What am I? seed secret
2. Lots of people buy and eat me. What am I? salt rice empty

CHECK YOUR UNDERSTANDING

1. Choose the correct answers.
1. What is the main idea of the story?
a. Making salt water
b. Growing a lot of rice
c. Becoming a rich farmer
2. How does Brian grow a lot of rice?
a. He only uses the good seeds.
b. He only uses empty seeds.
c. He only uses salt water.
3. The secret is _____.
a. water b. salt c. density

2. Look, read, and check.
1. a. Brian puts rice seeds in salt water.
b. Brian puts rice seeds in oil.
2. a. Bad seeds float because they are empty.
b. Bad seeds float because they are full.

3. Fill in the blanks.
Density is the measure of a unit's _____ to its _____.
density = _____ ÷ _____
_____ = _____ ÷ _____

4. Unscramble and write.
1. c / a / i / l
2. d / s / a / u
3. u / i / m / p / y
4. s / a / u / i / c / i / r
5. o / g / i / w
6. a / s / i / l

PROJECT DENSITY CHART
Look at the chart below:
Density chart table with columns: Object, Mass (g), Volume (mL), Density (g/mL).
STEP 1: Put the objects in order from highest to lowest density.
STEP 2: Which objects sink? Why do they sink?
STEP 3: Which objects float? Why do they float?

[WARM-UP]

- Discuss the warm-up question to see how much background information students possess about the topic.
- Sample Answer: Farmers need to think about the weather, water, food for animals, crops, their animals' health, equipment, etc.

[KEY WORDS]

- Have students look at the picture and play the audio. Have them repeat each word while looking at the picture to match the photograph and sound. Give simple explanations and examples when necessary.
- After practicing each word, play the audio again.
- Give students time to complete the exercise. Then have them check their answers in pairs or as a class.
- Answer: 2, 3, 1, 4, 6, 5

[READING]

- Play the audio once. After playing the audio, do choral reading and ask the students to repeat after you. Ask the students to point at each word as they read it.
- If necessary, have them read the text one more time by doing popcorn reading. (Have students take turns reading one line from the story. After they read one line, they call on another classmate to read the next line.)

[SHORT ACTIVITIES]

- Have students circle the key words to help them understand their meaning.
- Have them individually answer question D. Check the answer as a class and give a simple explanation if necessary.
- Answer: 1. secret 2. rice

[AHA! I SEE!]

- Direct students' attention for further detail.
- Have them read the context to know what density is. Help them understand density with mass and volume.
- Refer to Background Knowledge for density of more materials. Pick some materials in home, and briefly discuss it as time allows.

[CHECK YOUR UNDERSTANDING]

- Give students 5-10 minutes to write their answers. Remind them to not refer to the reading or previous pages to check their understanding.
- Elicit answers from students. If there are any disagreements between students on the answers, have them cite the lines in the text that support their choices. For purpose, inference, or topic questions, elicit reasons why distractors are incorrect choices (ex. not in text, inaccurate, minor detail, etc.).
- Answer:
 - A. Choose the correct answers. 1. b 2. a 3. c
 - B. Look, read, and check. 1. a 2. a
 - C. Fill in the blanks.
 - Density is the measure of a unit's mass to its volume.
 - density = mass / volume
 - low density (box that is high)
 - high density (box that is low)
 - D. Unscramble and write. 1. rice 2. seed 3. empty 4. secret 5. grow 6. salt

[STEAM PROJECT]

- Have students answer the questions.
- Have them share the results of steps 1 to 3 with their partner or group. Ask different pairs of groups to represent their results to the class.
- Answer:
 - Step 1: gold, silver, steel, water, ice, milk
 - Step 2: Gold, silver, and steel sink because they have higher density than water.
 - Step 2-1: milk and ice float. Because they have lower density than water.

Unit 15. Cars of the Future

S T E A M

Academic Objective	Learn about electric cars and the engineers who make them
Vocabulary	battery, burn, gasoline, clean, engine, quiet
STEAM Project	Design Your Car of the Future 21st Century Skills: Critical Thinking, Creativity, Collaboration, Communication

Unit 15: CARS OF THE FUTURE

KEY WORDS
Look, listen, and repeat.

- battery
- burn
- gasoline
- clean
- engine
- quiet

READING
Listen and read.
Look at the sign. What does it mean?
Electric cars use a battery.
They don't burn gasoline.
They aren't dirty. They are clean.
Because of this, they are good for Earth.
Who makes electric cars?
Electric car engineers make electric cars.

WARM-UP
Read and choose.
1. I am a liquid. A car burns me to move. What am I? ☐ battery ☐ gasoline
2. You charge me. I give your car energy. What am I? ☐ burn ☐ battery

CHECK YOUR UNDERSTANDING

1. Choose the correct answer.
1. What is the main idea of the reading?
a. To ask you to become an electric car engineer.
b. To tell us the difference between gas cars and electric cars.
c. To talk about the characteristics of electric cars and the job electric car engineers do.
2. What do electric cars need to move?
a. Gasoline b. An engine c. A battery
3. Why are electric cars good for Earth?
a. They are noisy.
b. They aren't dirty.
c. They are cheap.
4. Circle the correct word.
1. This gas car uses a(n) battery / engine.
2. This is a radio engine / battery.
3. This bathroom is noisy / clean.
4. An electric car doesn't burn / clean gasoline.
5. Burning gasoline / electricity is bad for Earth.
6. Please be noisy / quiet.

DESIGN YOUR CAR OF THE FUTURE
STEP 1: What is your car of the future like?
STEP 2: What is your car of the future like?
STEP 3: What is your car of the future like?

[WARM-UP]

- Discuss the warm-up question to see how much background information students possess about the topic.
- Sample Answer: convertible, sedan, pickup, truck, hatchback, bug, SUV, minivan

[KEY WORDS]

- Have students look at the picture and play the audio. Have them repeat each word while looking at the picture to match the photograph and sound. Give simple explanations and examples when necessary.
- After practicing each word, play the audio again.
- Give students time to complete the exercise. Then have them check their answers in pairs or as a class.
- Answer: 2, 1, 3, 6, 4, 5

[READING]

- Play the audio once. After playing the audio, do choral reading and ask the students to repeat after you. Ask the students to point at each word as they read it.
- If necessary, have them read the text one more time by doing popcorn reading. (Have students take turns reading one line from the story. After they read one line, they call on another classmate to read the next line.)

[SHORT ACTIVITIES]

- Have students circle the key words to help them understand their meaning.
- Have them individually answer question D. Check the answer as a class and give a simple explanation if necessary.
- Answer: 1. gasoline 2. battery

[AHA! I SEE!]

- Direct students' attention for further detail.
- Have them read the context to know the electric cars and the engineers. Help them understand advantages of the electric cars.
- Refer to Background Knowledge for more information about electric car engineer. Pick some vehicles that students have answered in Warm-Up, and briefly discuss how they might change in the future.

[CHECK YOUR UNDERSTANDING]

- Give students 5-10 minutes to write their answers. Remind them to not refer to the reading or previous pages to check their understanding.
- Elicit answers from students. If there are any disagreements between students on the answers, have them cite the lines in the text that support their choices. For purpose, inference, or topic questions, elicit reasons why distractors are incorrect choices (ex. not in text, inaccurate, minor detail, etc.).
- Answer:
- A. Choose the correct answers. 1. c 2. c 3. b
- B. Look, read, and check. 1. a 2. b
- C. Complete the chart.
Electric cars are good for Earth.
They are clean. They are quiet.
- D. Circle the correct word. 1. engine 2. battery 3. clean 4. burn 5. gasoline 6. quiet

[STEAM PROJECT]

- Have students design their own car of the future.
- Have them share the results of step 2 with their partner or group. Ask different pairs of groups to represent their results to the class.
- Answer:
- My car of the future is a flying car. It doesn't have wheels. It can fly, but it doesn't have wings.

Unit 16. Recording Sounds

Academic Objective	Learn about recording sounds and sound engineers
Vocabulary	headphones, music, loud, clear, microphone, change
STEAM Project	Making a Musical Instrument
	21st Century Skills: Critical Thinking, Creativity

The image shows a worksheet for Unit 16, 'Recording Sounds'. It includes a 'KEY WORDS' section with a list of words and their corresponding pictures: headphones, music, loud, clear, microphone, and change. The 'READING' section contains a passage about sound engineers and their work. The 'CHECK YOUR UNDERSTANDING' section has three parts: 'Choose the correct answers', 'Look, read, and check', and 'Complete the chart'. The 'MAKING A MUSICAL INSTRUMENT' section has a table for recording data and a 'STEP 2' section for drawing and labeling a musical instrument.

[WARM-UP]

- Discuss the warm-up question to see how much background information students possess about the topic.
- Sample Answer: I think music sounds clearer when I put my headphones on.

[KEY WORDS]

- Have students look at the picture and play the audio. Have them repeat each word while looking at the picture to match the photograph and sound. Give simple explanations and examples when necessary.
- After practicing each word, play the audio again.
- Give students time to complete the exercise. Then have them check their answers in pairs or as a class.
- Answer: 2, 5, 3, 6, 1, 4

[READING]

- Play the audio once. After playing the audio, do choral reading and ask the students to repeat after you. Ask the students to point at each word as they read it.
- If necessary, have them read the text one more time by doing popcorn reading. (Have students take turns reading one line from the story. After they read one line, they call on another classmate to read the next line.)

[SHORT ACTIVITIES]

- Have students circle the key words to help them understand their meaning.
- Have them individually answer question D. Check the answer as a class and give a simple explanation if necessary.
- Answer: 1. music 2. change

[CHECK YOUR UNDERSTANDING]

- Give students 5-10 minutes to write their answers. Remind them to not refer to the reading or previous pages to check their understanding.
- Elicit answers from students. If there are any disagreements between students on the answers, have them cite the lines in the text that support their choices. For purpose, inference, or topic questions, elicit reasons why distractors are incorrect choices (ex. not in text, inaccurate, minor detail, etc.).
- Answer:
 - A. Choose the correct answers. 1. a 2. b 3. b
 - B. Look, read, and check. 1. a 2. b
 - C. Complete the chart.
Sound engineers record music.
They use a microphone.
Their machine changes the music they record.
 - D. Look, match, and write.
1. microphone 2. music 3. clear 4. loud 5. headphones 6. change

[STEAM PROJECT]

- Have students do the experiment.
- Have them share the results of step 2 with their partner or group. Ask different pairs of groups to represent their results to the class.
- Refer to PROJECT REFERENCE at the end of the book for further explanation.
- Give the answer and with reasons based on PROJECT REFERENCE.
- Answer:
 - When I hit the bowls one after the other, I always get a different sound. The bowl with the lowest level water makes a low sound. The bowl with the highest level of water makes a high sound.
